

**YK SYSTEMS**

FREE PACKAGE 001 | 2026 EDITION

# The Automation Starter Vault

25 practical AI prompts, 10 workflow blueprints, and a clear first step for business automation.

START SMALL. BUILD WHAT MATTERS. KEEP HUMAN CONTROL.

Free practical resource | [hub.yksystems.ca](https://hub.yksystems.ca)

## Included

- Flagship book: Automation Builder Blueprint - Professional Edition 2026, filled 130-page customer-ready edition
- 25 starter AI prompts
- 10 workflow blueprints
- Beginner checklist: What Should I Automate First?
- Business-type guide
- Upgrade path to YK SYSTEMS services

## Beginner Checklist: What Should I Automate First?

Choose a task that scores high on at least three of these:

- It happens every week.
- It takes more than 15 minutes each time.
- It affects leads, sales, service, reporting, or customer experience.
- It follows a predictable pattern.
- It requires copying information between tools.
- It causes mistakes when people are busy.
- It would be valuable even if it only worked 80% of the time with human review.

Do not start with the biggest system. Start with the clearest repeated task.

## Business-Type Guide

### Small Businesses

Start with lead intake, quote requests, review requests, missed-call follow-up, and customer CRM.

### Creators and Coaches

Start with content calendars, script generation, lead magnet delivery, newsletter repurposing, and client onboarding.

### Contractors and Field Teams

Start with daily site reports, photo organization, safety checklists, incident reports, and client proof reports.

## Agencies and Freelancers

Start with discovery forms, proposal generation, onboarding, project trackers, and monthly client reports.

## E-commerce and Digital Product Sellers

Start with product listing templates, launch checklists, customer replies, upsell emails, and review requests.

# 25 Starter AI Prompts

## 1. Business Automation Opportunity Finder

Who it is for: Small business owners, founders, and operators.

Problem it solves: Helps identify the best first workflow to automate.

Tools needed: ChatGPT or another AI assistant.

Prompt:

You are a business automation strategist. Ask me up to 10 questions about my business, repeated tasks, lead flow, customer service, admin work, and tools. Then recommend the top 5 automation opportunities ranked by impact, difficulty, and time saved. For each one, explain the trigger, steps, tools, and first version to build.

How to use it: Answer the questions honestly and pick the highest-impact low-difficulty workflow.

How to sell/build it as a service: Offer a workflow audit that turns the output into a real system map.

Upgrade path: YK SYSTEMS can build the chosen workflow.

## 2. Client Intake Form Builder

Who it is for: Service businesses, freelancers, agencies, contractors.

Problem it solves: Stops leads from arriving without enough details.

Tools needed: Google Forms, Typeform, Tally, or website form.

Prompt:

You are a client intake specialist. Create a short but complete intake form for a {{business\_type}}. The form should collect contact details, service needed, timeline, budget, location if relevant, project description, urgency, and how they found us. Keep it easy for a serious lead to complete in under 3 minutes.

How to use it: Replace {{business\_type}}, build the form, and connect it to a tracker.

How to sell/build it as a service: Sell a done-for-you intake form and lead tracker.

Upgrade path: YK SYSTEMS can connect the form to CRM and follow-up.

### 3. Lead Qualification Scorer

Who it is for: Any business receiving inconsistent leads.

Problem it solves: Helps prioritize the best leads first.

Tools needed: AI assistant and CRM sheet.

Prompt:

You are a lead qualification assistant. Create a scoring system from 1 to 100 for leads in a {{business\_type}} business. Use budget, urgency, fit, clarity, location, timeline, and service type. Then give me a simple Google Sheets column structure and rules for labeling leads as Hot, Warm, or Cold.

How to use it: Add score and status columns to the CRM.

How to sell/build it as a service: Offer lead pipeline cleanup and scoring setup.

Upgrade path: YK SYSTEMS can automate scoring later.

### 4. Sales Follow-Up Writer

Who it is for: Sales teams, service businesses, consultants.

Problem it solves: Creates useful follow-up messages.

Tools needed: Gmail, CRM, AI assistant.

Prompt:

You are a helpful sales follow-up writer. Write 5 follow-up messages for a lead who requested {{service}} but has not replied. Keep the tone professional, warm, and useful. Include one short email, one SMS, one LinkedIn message, one final check-in, and one value-first message that includes a tip.

How to use it: Save the messages as templates and personalize before sending.

How to sell/build it as a service: Include follow-up templates in a lead system setup.

Upgrade path: YK SYSTEMS can trigger reminders and draft replies automatically.

## 5. Quote Request Workflow Planner

Who it is for: Contractors, trades, local services.

Problem it solves: Makes quote requests more complete.

Tools needed: Form, Google Sheets, email.

Prompt:

Create a quote request workflow for a {{trade\_or\_service}} business. Include the form fields, CRM columns, automatic confirmation email, internal notification, follow-up schedule, and quote status stages from New to Won or Lost.

How to use it: Turn the output into a form and status tracker.

How to sell/build it as a service: Package it as a quote request automation setup.

Upgrade path: YK SYSTEMS can connect reminders and reporting.

## 6. Review Request Generator

Who it is for: Local businesses and service teams.

Problem it solves: Gets more customer reviews after completed work.

Tools needed: Gmail, SMS tool, Google Business Profile link.

Prompt:

Write a review request sequence for a {{business\_type}} after a job is completed. Include one same-day message, one follow-up after 3 days, and one thank-you reply if the customer leaves a review. Keep it human, brief, and not pushy.

How to use it: Send after job completion or connect to a job tracker.

How to sell/build it as a service: Offer review growth workflow setup.

Upgrade path: YK SYSTEMS can automate job-complete triggers and reminders.

## 7. Content Calendar Generator

Who it is for: Creators, coaches, agencies, businesses.

Problem it solves: Turns vague ideas into a posting plan.

Tools needed: AI assistant, Google Sheets, Notion.

Prompt:

```
Create a 30-day content calendar for a {{business_type}} targeting {{audience}}.  
Include post topic, platform, hook, content format, call to action, and repurposing  
idea. Balance educational, proof, story, and offer-based posts.
```

How to use it: Copy the table into a content tracker.

How to sell/build it as a service: Sell content system setup or monthly content planning.

Upgrade path: YK SYSTEMS can build a content operations board.

## 8. Reel Script Generator

Who it is for: Creators and service businesses.

Problem it solves: Creates short video scripts.

Tools needed: AI assistant.

Prompt:

```
Write 10 short video scripts for {{business_type}}. Each script needs a 2-second  
hook, 3 teaching points, one practical example, and a call to action. Keep each  
script under 45 seconds.
```

How to use it: Record the scripts and track performance.

How to sell/build it as a service: Bundle with content calendar setup.

Upgrade path: YK SYSTEMS can automate script generation from long-form content.

## 9. Newsletter Repurposing Prompt

Who it is for: Creators, founders, consultants.

Problem it solves: Turns one idea into many assets.

Tools needed: AI assistant, newsletter platform.

Prompt:

```
Turn this topic into a newsletter, 5 social posts, 3 short video hooks, and 1 lead magnet idea. Topic: {{topic}}. Audience: {{audience}}. Keep the tone practical and specific.
```

How to use it: Paste one idea and schedule the outputs.

How to sell/build it as a service: Offer content repurposing systems.

Upgrade path: YK SYSTEMS can connect content databases and publishing workflows.

## 10. Customer Support Reply Library

Who it is for: Small businesses and online sellers.

Problem it solves: Standardizes common replies.

Tools needed: AI assistant, Gmail templates.

Prompt:

```
Create a customer support reply library for a {{business_type}}. Include responses for pricing, booking, delays, refunds, complaints, rescheduling, product questions, and thank-you messages. Keep replies clear, calm, and helpful.
```

How to use it: Save as canned replies and customize before sending.

How to sell/build it as a service: Sell customer response template setup.

Upgrade path: YK SYSTEMS can build support triage and draft automation.

## 11. Admin Task SOP Creator

Who it is for: Owners hiring help or delegating tasks.

Problem it solves: Converts repeated admin tasks into instructions.

Tools needed: AI assistant, Google Docs, Notion.

Prompt:

Create a standard operating procedure for this repeated task: {{task}}. Include purpose, required tools, step-by-step instructions, quality checklist, common mistakes, and when to escalate to the owner.

How to use it: Create SOPs before delegating.

How to sell/build it as a service: Offer SOP library creation.

Upgrade path: YK SYSTEMS can build a searchable operations hub.

## 12. Google Sheets CRM Designer

Who it is for: Beginners needing a simple CRM.

Problem it solves: Creates a usable tracking sheet.

Tools needed: Google Sheets.

Prompt:

Design a simple Google Sheets CRM for a {{business\_type}}. Include columns for lead details, source, service needed, value, status, priority, last contacted, next follow-up date, owner, notes, and outcome. Explain how to use each column.

How to use it: Create the columns and enter every lead.

How to sell/build it as a service: Sell CRM starter setup.

Upgrade path: YK SYSTEMS can connect forms and automation.

## 13. Missed Lead Recovery Message

Who it is for: Businesses with old inquiries.

Problem it solves: Revives leads that never got followed up.

Tools needed: CRM or inbox.

Prompt:

```
Write 5 short missed-lead recovery messages for people who contacted a {{business_type}} but never booked. Make the messages honest, helpful, and not awkward. Include email and SMS versions.
```

How to use it: Send to old inquiries and track replies.

How to sell/build it as a service: Offer lead recovery campaign setup.

Upgrade path: YK SYSTEMS can automate reminders so leads stop going cold.

## 14. Digital Product Idea Validator

Who it is for: Creators and digital sellers.

Problem it solves: Generates product ideas from audience pain points.

Tools needed: AI assistant.

Prompt:

```
Act as a digital product strategist. Based on this audience: {{audience}}, create 15 digital product ideas. For each idea include problem solved, promise, format, price range, free lead magnet, and upsell path.
```

How to use it: Pick one idea and build a free-to-paid funnel.

How to sell/build it as a service: Offer digital product strategy packages.

Upgrade path: YK SYSTEMS can build landing pages and automation.

## 15. Gumroad Product Listing Writer

Who it is for: Digital product sellers.

Problem it solves: Creates product page copy.

Tools needed: Gumroad.

Prompt:

```
Write a Gumroad product listing for {{product_name}}. Include title, subtitle, description, who it is for, what is included, outcomes, FAQ, and a short creator note. Make it clear and trust-building.
```

How to use it: Paste into Gumroad and adjust details.

How to sell/build it as a service: Sell product launch setup.

Upgrade path: YK SYSTEMS can build the product funnel.

## 16. Contractor Daily Report Builder

Who it is for: Contractors and field teams.

Problem it solves: Standardizes daily field reporting.

Tools needed: Form, Sheet, photo storage.

Prompt:

```
Create a daily site report template for a {{contractor_type}}. Include date, site, crew, work completed, blockers, safety notes, materials, equipment, photos needed, client notes, and supervisor approval.
```

How to use it: Use as a daily form or checklist.

How to sell/build it as a service: Offer field operations reporting setup.

Upgrade path: YK SYSTEMS can connect it to GrandProof-style proof workflows.

## 17. Incident Report Workflow

Who it is for: Field teams and operations managers.

Problem it solves: Captures incident details consistently.

Tools needed: Form, storage, notification.

Prompt:

```
Create an incident report workflow for a field operations business. Include required fields, photo requirements, escalation steps, internal notification, review process, and final record storage.
```

How to use it: Make it available to supervisors.

How to sell/build it as a service: Offer safety/admin documentation workflow setup.

Upgrade path: YK SYSTEMS can build secure reporting systems.

## 18. Client Onboarding Checklist

Who it is for: Agencies, freelancers, consultants.

Problem it solves: Reduces messy project starts.

Tools needed: Docs, forms, project tracker.

Prompt:

```
Create a client onboarding checklist for a {{service_type}} business. Include welcome email, required assets, access requests, project timeline, communication rules, kickoff questions, and first-week tasks.
```

How to use it: Send after payment or proposal approval.

How to sell/build it as a service: Build onboarding systems.

Upgrade path: YK SYSTEMS can automate onboarding tasks.

## 19. Proposal Generator

Who it is for: Freelancers and service businesses.

Problem it solves: Speeds up proposal writing.

Tools needed: AI assistant, Docs.

Prompt:

```
Create a professional proposal for {{service}} for {{client_type}}. Include problem, goals, scope, deliverables, timeline, investment, what is not included, next steps, and acceptance section.
```

How to use it: Customize before sending.

How to sell/build it as a service: Offer proposal templates and CRM setup.

Upgrade path: YK SYSTEMS can connect proposal intake to delivery tasks.

## 20. Monthly Client Report Builder

Who it is for: Agencies and consultants.

Problem it solves: Turns activity into client-ready reporting.

Tools needed: AI assistant, Docs, Sheets.

Prompt:

```
Create a monthly client report template for a {{service_type}} provider. Include summary, work completed, metrics, insights, blockers, next month plan, decisions needed, and client action items.
```

How to use it: Fill monthly and send consistently.

How to sell/build it as a service: Build reporting systems.

Upgrade path: YK SYSTEMS can automate report drafts.

## 21. AI Assistant Role Designer

Who it is for: Businesses wanting custom AI helpers.

Problem it solves: Defines what an AI assistant should and should not do.

Tools needed: ChatGPT or custom GPT builder.

Prompt:

```
Design a custom AI assistant for a {{business_type}}. Define its role, tasks, tone, data it needs, tasks it must avoid, example prompts, output formats, and human review rules.
```

How to use it: Use the role spec to build a custom GPT or internal prompt.

How to sell/build it as a service: Offer AI assistant setup.

Upgrade path: YK SYSTEMS can build and document the assistant.

## 22. SOP to Checklist Converter

Who it is for: Teams with long documents.

Problem it solves: Makes instructions easier to execute.

Tools needed: AI assistant.

Prompt:

Turn this SOP into a practical checklist with owner, timing, required tools, completion criteria, and escalation rules. SOP: `{{paste_sop}}`

How to use it: Use checklists for training and quality control.

How to sell/build it as a service: Offer operations documentation cleanup.

Upgrade path: YK SYSTEMS can build a workflow library.

## 23. Lead Magnet Planner

Who it is for: Service businesses and creators.

Problem it solves: Creates a free resource that attracts leads.

Tools needed: AI assistant, landing page, download tool.

Prompt:

Create 10 lead magnet ideas for a `{{business_type}}` targeting `{{audience}}`. For each idea include title, promise, format, landing page headline, form fields, follow-up email idea, and paid offer connection.

How to use it: Pick the simplest useful free resource.

How to sell/build it as a service: Build lead magnet funnels.

Upgrade path: YK SYSTEMS can build the full landing page and follow-up.

## 24. Automation ROI Estimator

Who it is for: Owners deciding what is worth building.

Problem it solves: Estimates value from time saved or leads recovered.

Tools needed: AI assistant, calculator.

Prompt:

Help me estimate the ROI of automating `{{task}}`. Ask for current time spent, frequency, hourly value, error cost, lead value, and expected improvement. Then calculate monthly time saved, monthly value, and a reasonable setup budget.

How to use it: Use ROI to prioritize paid setup.

How to sell/build it as a service: Include ROI in proposals.

Upgrade path: YK SYSTEMS can scope the automation from the estimate.

## 25. First Automation Build Plan

Who it is for: Anyone ready to start.

Problem it solves: Converts an idea into a 7-day execution plan.

Tools needed: AI assistant.

Prompt:

```
Create a 7-day build plan for my first automation: {{automation_idea}}. Include daily tasks, tools, data fields, messages, testing steps, risks, and a simple success metric.
```

How to use it: Follow the plan and build a first version.

How to sell/build it as a service: Turn this into a paid implementation plan.

Upgrade path: YK SYSTEMS can build it for the client.

# 10 Workflow Blueprints

## 1. Client Intake Automation

Business problem: Leads arrive scattered and incomplete.

Tools needed: Google Forms, Google Sheets, Gmail, AI assistant.

Step-by-step setup:

1. Create an intake form.
2. Ask for name, email, phone, service, budget, urgency, and project notes.
3. Connect responses to Google Sheets.
4. Add status, priority, next follow-up, owner, and notes columns.
5. Create a confirmation email template.
6. Review new rows daily.

AI prompt:

Draft a friendly confirmation email for a new {{service}} inquiry. Mention that we received their request, explain what happens next, and ask for any missing information.

How to use it: Make the form the main lead capture link.

How to sell it as a service: Offer a \$150-\$500 intake and CRM setup.

Upgrade path: YK SYSTEMS can add automated replies and reminders.

## 2. Lead Follow-Up Automation

Business problem: Leads go cold after the first reply.

Tools needed: CRM sheet, Gmail templates, calendar reminders.

Step-by-step setup:

1. Add last contacted and next follow-up columns.
2. Create follow-up stages for day 1, day 3, day 7, and final check-in.
3. Write email and SMS templates.
4. Review due follow-ups daily.
5. Track replies and outcomes.

AI prompt:

Write a 4-step follow-up sequence for a {{business\_type}} lead who asked about {{service}} but has not replied.

How to use it: Send useful reminders without sounding desperate.

How to sell it as a service: Package as lead recovery setup.

Upgrade path: YK SYSTEMS can automate reminders and draft messages.

## 3. Quote Request Workflow

Business problem: Quotes take too long because details are missing.

Tools needed: Form, CRM sheet, Gmail.

Step-by-step setup:

1. Create quote form fields by service type.
2. Send form responses to a quote tracker.
3. Add quote status: New, Needs Info, Quoted, Won, Lost.
4. Create internal notification.
5. Create customer confirmation.
6. Track quote value and outcome.

AI prompt:

```
Create a quote request checklist for {{trade_or_service}} so the team can prepare an accurate estimate.
```

How to use it: Send the quote form before scheduling.

How to sell it as a service: Offer quote workflow setup.

Upgrade path: YK SYSTEMS can add file uploads and quote reminders.

## 4. Review Request Workflow

Business problem: Happy customers forget to leave reviews.

Tools needed: Google Business Profile link, email or SMS.

Step-by-step setup:

1. Add a job-complete status to the CRM.
2. Write a short review request message.
3. Send the message after completion.
4. Follow up after 3 days.
5. Record review status.

AI prompt:

```
Write a short review request for a happy {{business_type}} customer. Keep it sincere and easy to act on.
```

How to use it: Trigger after every completed job.

How to sell it as a service: Offer reputation workflow setup.

Upgrade path: YK SYSTEMS can automate review tracking.

## 5. Content Repurposing Workflow

Business problem: One good idea is not turned into enough content.

Tools needed: AI assistant, Google Sheets or Notion.

Step-by-step setup:

1. Create a content idea tracker.
2. Add columns for topic, audience, platform, format, status.
3. Use AI to generate posts from one topic.
4. Schedule content manually at first.
5. Review performance weekly.

AI prompt:

```
Turn this idea into 1 newsletter, 5 short posts, 3 video hooks, and 1 call to action.  
Idea: {{idea}}.
```

How to use it: Batch content weekly.

How to sell it as a service: Offer content operations setup.

Upgrade path: YK SYSTEMS can connect intake, drafts, and publishing boards.

## 6. Email Newsletter Workflow

Business problem: Email ideas stay scattered and unused.

Tools needed: AI assistant, email platform, content tracker.

Step-by-step setup:

1. Create a newsletter idea bank.
2. Choose one weekly topic.
3. Draft with AI.
4. Edit manually.
5. Schedule the newsletter.
6. Repurpose into social posts.

AI prompt:

Write a practical newsletter for {{audience}} about {{topic}}. Include a hook, story, useful lesson, checklist, and soft call to action.

How to use it: Use one topic per week.

How to sell it as a service: Offer newsletter system setup.

Upgrade path: YK SYSTEMS can build a content-to-email workflow.

## 7. Google Form to Google Sheets CRM

Business problem: There is no single source of truth for leads.

Tools needed: Google Forms, Google Sheets.

Step-by-step setup:

1. Create the lead form.
2. Link it to a spreadsheet.
3. Add CRM columns to the response sheet.
4. Add filters by status and priority.
5. Review every morning.

AI prompt:

Design CRM columns for a simple {{business\_type}} lead tracker and explain how each column should be used.

How to use it: Make this the minimum CRM.

How to sell it as a service: Offer a CRM starter setup.

Upgrade path: YK SYSTEMS can add automation and reporting.

## 8. Missed Lead Follow-Up System

Business problem: Old leads never get reactivated.

Tools needed: Inbox export, CRM, email.

Step-by-step setup:

1. Collect old inquiries.

2. Add them to a recovery sheet.
3. Segment by service and age.
4. Send a helpful recovery message.
5. Track replies.

AI prompt:

```
Write a polite missed-lead recovery message for someone who contacted us about {{service}} but never booked.
```

How to use it: Run once per month.

How to sell it as a service: Offer lost lead recovery.

Upgrade path: YK SYSTEMS can create recurring lead reactivation.

## 9. Invoice Reminder Workflow

Business problem: Payments are delayed because reminders are manual.

Tools needed: Invoice list, Gmail templates.

Step-by-step setup:

1. Track invoice date, amount, due date, status.
2. Create reminder templates for before due, due today, and overdue.
3. Review unpaid invoices weekly.
4. Send reminders.
5. Mark paid when resolved.

AI prompt:

```
Write professional invoice reminder emails for before due, due today, 7 days overdue, and final reminder. Keep the tone firm but respectful.
```

How to use it: Keep payment follow-up consistent.

How to sell it as a service: Offer admin automation setup.

Upgrade path: YK SYSTEMS can connect payment tools and reminders.

## 10. Simple AI Customer Response Workflow

Business problem: Repeated customer questions take too much time.

Tools needed: AI assistant, reply library, Gmail.

Step-by-step setup:

1. List the 20 most common customer questions.
2. Create approved response templates.
3. Use AI to draft replies from the templates.
4. Review before sending.
5. Update templates monthly.

AI prompt:

```
Using this approved answer library, draft a reply to the customer question below.  
Keep the same policy and tone. Question: {{question}}.
```

How to use it: Draft faster while keeping human review.

How to sell it as a service: Offer response library and AI assistant setup.

Upgrade path: YK SYSTEMS can create a custom support assistant.

## Expansion Roadmap Toward 200 Templates

- Small Business Operations: 25
