

AI Agent Deployment Toolkit

Templates, Governance, Approval Flows, and
Free Implementation Pack

CUSTOMER OVERVIEW

Practical guidance for designing governed, testable AI agent systems.

Free customer resource | YK SYSTEMS | hub.yksystems.ca

Welcome to the AI Agent Deployment Toolkit

This toolkit helps you move from learning about AI agents to planning a practical, governed implementation. Use the manual to understand the system, then use the templates and starter kits to map a first deployment.

Start here

1. Read the Field Manual sections that match your business problem.
2. Choose one repeated task, missed handoff, or reporting bottleneck.
3. Complete the Agent Blueprint Template and Operations Workbook.
4. Use the visual mockups and starter kits to plan the workflow.
5. Add permissions, approval gates, logs, tests, and an owner before launch.

A useful first implementation is small enough to explain clearly and valuable enough to remove a real operational headache.

What is included

Editable templates

- YK Systems AI Agent Blueprint Template v4
- YK Systems Agent Operations Workbook v4
- YK Systems Client Handoff Packet Template v4
- YK Systems Proposal and Scope Template v4
- YK Systems Review Report Template v4

Visual proof-of-work mockups

- Approval Queue Mockup
- Audit Log Mockup
- Content Ops Agent System Mockup
- Customer Support Agent System Mockup
- Lead Follow Up Agent System Mockup
- Multi Agent Business OS Mockup
- Reporting Agent System Mockup
- YK Systems Visual Mockups Contact Sheet v4

Starter kits and implementation packs

Tool starter kits

- YK Systems Airtable Agent CRM Starter v4
- YK Systems Claude Cursor Workspace Starter v4
- YK Systems MCP Access Planning Starter v4
- YK Systems Make Agent Workflow Starter v4
- YK Systems Supabase Agent Backend Starter v4
- YK Systems Zapier Agent Workflow Starter v4
- YK Systems n8n Agent Workflow Starter v4

Industry mini-packs

- YK Systems Contractor Agent System Pack v4
- YK Systems Creator Agency Agent System Pack v4
- YK Systems Digital Product Support Agent Pack v4
- YK Systems Local Service Business Agent Pack v4
- YK Systems Travel Agency Agent System Pack v4

Client delivery assets

- YK Systems Build Kickoff Checklist v4
- YK Systems Client Asset Request Form v4
- YK Systems Client Email Sequence v4
- YK Systems Monthly Maintenance Offer Sheet v4

Deployment standard

Before any production launch, confirm these controls:

- The business problem and smallest useful workflow are written down.
- Inputs, outputs, tools, and data sources are explicit.
- Tool permissions follow least privilege.
- External actions have human approval where needed.
- Logs record important decisions and actions.
- Happy-path, missing-data, denied-permission, and failure tests pass.
- An owner knows how to pause the workflow and handle exceptions.
